

**Buschmann tools**  
INVENTION | PRODUCTION

A close-up photograph of a person's arm with a detailed tattoo of a ship's mast and rigging. The person is wearing a black work glove and operating a red and black Buschmann tool. The tool is a complex mechanical device with a red handle and a black body, featuring a vertical adjustment screw and a horizontal lever. It is being used to work on a metal component that is part of a larger assembly. The background is dark, and the lighting highlights the tool and the person's arm.

# FALZBENDER

Hand-held and portable set of two benders for quick and effortless double standing seam folding.

## MAX THICKNESS

STAINLESS STEEL: 0.5 MM

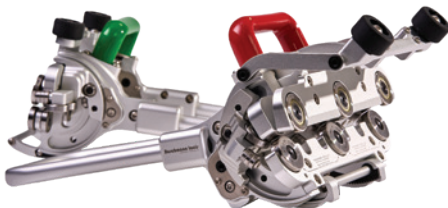

PAINTED STEEL: 0.7 MM

ALUMINUM, COPPER, ZINC: 0.8 MM

UPPER PROFILE MACHINE: **6 KG**

BOTTOM PROFILE MACHINE: **4 KG**

SKU# 0700

# INDUSTRY FRONT-RUNNER: FIRST PRODUCT ON THE MARKET

that allows to do two or three bends in one operation.

PERFECT REPLACEMENT FOR  
BIGGER MACHINERY TOOLS  
FOR SMALLER WORKS

HIGHEST QUALITY BENDING -  
WITHOUT WAVES OR WRINKLES.  
DOES NOT STRETCH METAL  
WHILE BENDING

Military grade  
case with safety  
foam included

# ROLL CUTTER

Cutting up to 0.8mm thick metal sheets easily with confidence. Its small and portable design makes it perfect to use anywhere.

## MAX THICKNESS

STAINLESS STEEL: 0.5 MM

PAINTED STEEL: 0.7 MM

ALUMINUM, COPPER, ZINC: 0.8

## MAX SPEED

25M / MIN

WEIGHT: **2.4 KG**

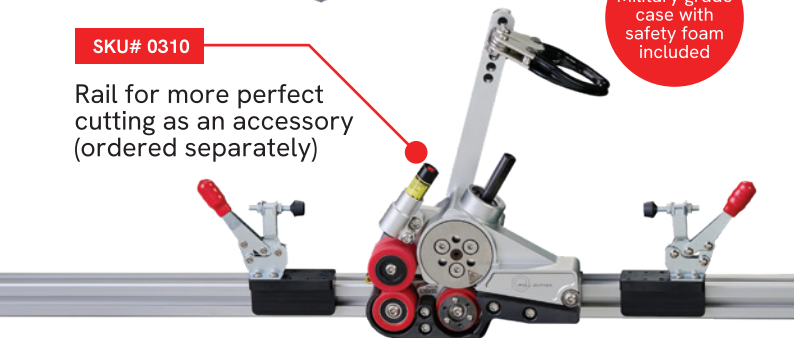

SKU# 0300

SKU# 0310

Rail for more perfect cutting as an accessory (ordered separately)

Military grade case with safety foam included

CUTTING TOOLS

 **FALZ CUTTER**

# FALZ CUTTER

Falz Cutter is intended for double-lock standing seam metal roof dismantling. It dissects double-lock standing seam connection places.

## MAX THICKNESS

# BENDER ACCESSORIES

## CHANGEABLE BENDING

### ROLLS **SKU#9001-#9004**

Easily exchangeable bending rolls to 2.0 mm of radius which are more suitable for bending soft materials like: zinc, aluminum, copper, etc., and protecting materials from breaking.

### RED HANDLE FOR DISC BENDER L

**SKU# 2031**

Transforms disc bender into the freehand roller.

### EASY CLAMP-ON HANDLE FOR BENDER

**SKU# 2032**

Designed to fit all bedners and created for increased comfort while bending (especially helpful working with XL benders).

DXL bender and its 45mm space  
between axle allows to bend already  
profiled material up to 40mm

# DXL SERIES BENDER

Designed to bend already profiled material and allows to reach over large bends.

## MAX THICKNESS

STAINLESS STEEL: 0.5 MM

PAINTED STEEL: 0.7 MM

ALUMINUM, COPPER, ZINC: 0.8

BENDING UP TO 100°

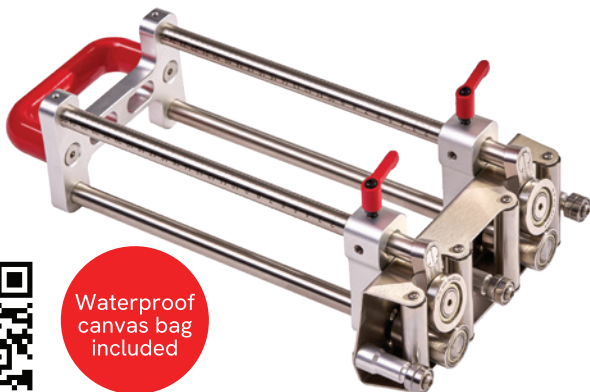

INSERTION DEPTH 5 - 100 MM
